

RING SIZING GUIDE

HOW TO USE THIS GUIDE

Begin by printing this page. Set page scaling to "100" in your print settings and use 8.5 x 11-inch standard paper. Once it's printed, use a ruler to confirm the printed paper size in the box to the right. Size away!

FIND YOUR FIT

METHOD 1: PRINT A RING SIZER

What you'll need:

- Scissors

1. Cut out the ring sizer and the slot as instructed.
2. Wrap the paper ring sizer snugly around the base of the intended finger so that the numbers are visible and insert the pointed end through the slit you made in the sizer.
3. Note the number that lines up with the slit; this is your ring size! Remember that quarter sizes are also available if your sizer indicates that you are between whole and half sizes.

METHOD 2: MEASURE AN EXISTING RING

What you'll need:

- Scissors
- An existing ring

1. Choose a ring that correctly fits the intended finger.
2. Lay the ring over each size circle within the chart until you can closely match the inside edge to one of the circles on the guide. This is your ring size! If the ring falls between two sizes, contact us to order the quarter size between them.

RING SIZE CONVERSION CHART

Millimeters are equivalent to the interior circumference of the corresponding ring size.
